

HPM3320E Modular Series

Online Transformerless UPS Series

Power range: 10~150kVA (3-Level PF: 1.0)

Mode: 3 phase input and 3 phase output

Module: 10/15/20/25/30kVA

Features

Modular Design

- ◆ All units adopt modular design, including power module, bypass module, monitoring module, can be easily integrated
- ◆ Power module, Bypass module, Monitoring module, ECU control module, all these modules are hot-swappable

High Reliability

- ◆ Wide input voltage range, line voltage range is 138-485V, UPS will derate to 40% when input voltage is below 305V
- ◆ UPS adopts multiple digital bus and redundancy parallel control system, making sure the whole system keep online if any single circuit fail
- ◆ The UPS will keep on single or parallel working, if any module fail
- ◆ Thickened conformal coating, applicable for harsh environment such as high heat, high humidity, dust

Green and Power Saving

- ◆ High input power factor, it is up to 0.99
- ◆ 3-level topology design, online efficiency up to 95.8%
- ◆ THDi<3% (100% linear load)
- ◆ The UPS will work in sleeping mode when the load is very small (Settable)

LBS Function

- ◆ LBS function can realize 2 independent UPS system work in synchronization, and it enhances the reliability of the system

Parallel Redundancy Function

- ◆ Support parallel expanded operation: maximum is 8 units
- ◆ Support sharing batteries for the UPS in parallel

Flexible Battery Configuration

- ◆ Batteries number of each group can be selected from 30 pieces to 50 pieces
- ◆ Large charging current can meet the requirement of long time backup

Strong Load Capability*

- ◆ Output power factor is 1.0, UPS can supply power to 100% unbalanced load
- ◆ High adaptability for load, it can connect full inductive load or capacitive load

Intelligent Management

- ◆ With 7 inches (Standard) and 10 inches (Optional) colorful touch LCD screen
- ◆ Support recording and exporting history logs and fault logs
- ◆ Support SNMP, RS232, RS485, Dry contact interface
- ◆ Support upgrading FW&SW on line (In bypass mode)
- ◆ EPO & REPO function

Compatible with Generator

- ◆ Power Walk In function, it can reduce the start current impact to system, and it can reduce the capacity of generator

*This series of products are not compatible with energy feedback loads, including but not limited to CT machines in the medical field, cutting machines in the semiconductor industry, and all types of elevators as well as other motor-driven equipment that incorporate energy feedback inverters at the front end.
